## EDUCATION

---

MAR 2018 | Doctoral Degree at **University of Grenoble Alpes**, Grenoble, France  
Early 2021 | Title : *Performance optimization in virtualized environments*  
Virtualization is the cornerstone of cloud computing platforms. It relies on a low-level kernel called the *hypervisor*(e.g. *Xen*) which allows the execution of several *virtual machines (VM)* on a physical machine. Our goal is to develop mechanisms to mitigate several issues related to virtualized infrastructures for efficient *resource utilization, better performance, and more resilient systems*.  
Supervised by : Prof. Noel De Palma and Prof. Alain Tchana

SEP 2011-SEP 2017 | Master degree in Computer Science  
Received at the **National Advanced School of Engineering**, Yaoundé, Cameroon

AUG 2011 | G.C.E Advanced Level at YAOUNDÉ, Cameroun  
Received at **Pi and Ju International Anglo-saxon College**.

## PROFESSIONAL EXPERIENCE

---

MAR 2017 | Research Internship  
SEP 2017 | **IRIT (Institut de Recherche en Informatique de Toulouse)**, Toulouse, France  
Our goal was to revisit the design of type I hypervisors such as Xen in order to propose a scheme for dynamic resource allocation (cpu+memory) for a central component which we referred as the privileged virtual machine (pVM). Furthermore, our design had to take in account novel memory architectures such as NUMA (non-uniform memory architecture) where a distance dimension renders allocation more tricky.  
Advisors: Prof. Daniel HAGIMONT, Prof. Alain TCHANA, and Ass. Prof Boris TEABE

SEP 2016 | L1 and L2 Teaching  
MAR 2017 | **ENSP**, Yaoundé, Cameroun  
I gave courses of **Operation System** to L1 students during the first semester of 2016-2017. I also gave practical courses of **Object Oriented Programming and IHM (Interface Homme Machine)** to L1 and L2 students respectively during the same semester.  
Referees: Dr. Batchakui BERNABÉ and Ing. Moubitang

MAY 2016 | Student Volunteer  
**ENSP**, Yaoundé, Cameroun

As a student volunteer, I participated in the set up of the logistic for the symposium organized on the theme "L'apport du Cloud et du Big Data dans l'économie numérique" at ENSP. It lasted 7 days from 14-21 May 2016.  
Referees: Prof. Alain TCHANA

JUL 2015 OCT 2016	<p>Trainee Internship <b>LIRIMA (Laboratoire International de Recherche en Informatique et Mathématiques Appliquées)</b>, Yaoundé, Cameroun</p> <p>This work was a result of a collaboration between the <b>University of Yaoundé I</b> and <b>Ecole Polytechnique Fédérale de Lausanne (EPFL)</b> under the <b>RESCIF</b> banner. The idea was to design and develop a caching system in order to speed up critical media resources load time for online courses. This enabled students to access these courses despite the low network throughput. The system is currently deployed at the <b>National School of Engineering of Yaoundé and Institut National Polytechnique Félix Houphouët-Boigny (INP-HB)</b> of Yamoussoukro in Ivory-Coast. Advisors: Dr. Batchakui BERNABÉ</p>
JUL 2015 SEP 2015	<p>Trainee Internship <b>Ministry of Defense</b>, Yaoundé, Cameroun</p> <p>We developed a software to enable army instructors to deliver media resources for a course exploitable by military members and track the progress of each member for a given course. The software named <b>HELIOS</b> is currently deployed and used at a military unit carrying the same name <b>HELIOS</b>. Advisors: Ing. Moubitang</p>
